

ACCEPTING CREDIT WITH THE APP

Everyone can accept debit and credit cards for free because Trail's End pays all fees.

Square readers are compatible and can be purchased at Amazon.com or most big box retailers.

Manual Entry (no reader) Type in the customer's card information.

Magstripe Reader (Android) Swipe reader plugs into headphone jack.

Lightning Reader (Apple) Swipe reader plugs into lightning jack.

Bluetooth Reader Wirelessly connects to a device via Bluetooth. Accepts EMV chip cards, Apple Pay, Google Pay, Samsung Pay, NFC Contactless and Tap to Pay.

Square is the brand name. It is important to call them "square" because that is the brand that works with the Trails End app. The TE app has Square built directly into it so that we can accept credit cards and have Trails End pays for all the processing fees. Units that use the stand-alone square app are responsible for paying those fees. So, make sure to use the Trails End app with the square reader when doing popcorn sales and the unit does not have to worry about those fees.

Just plug in the reader to the phone and make sure all app permissions are enabled. If you have a Bluetooth reader, you connect either through app settings or when you are doing the sale there is a symbol in the upper right corner you click to connect the reader.

If you are in a room and there is more than one device that has Bluetooth on, then it will not pair through app settings. Turn off Bluetooth on the one device and it will work for you
